NET CONTENTS: 1 GAL, 41 FL OZ (5 LITERS)
NET WEIGHT: 13.8 LB (6.25 KG)

XENAT-Ca™ 5-0-0 With 5.7% Calcium

Xenat-Ca is a proprietary blend of nitrogen derived, in part, from protein hydrolysate, the material obtained by hydrolysis of proteins to their constituent amino acids and short polypeptides. Xenat-Ca is formulated to help prevent and correct calcium deficiency in plants.

DIRECTIONS FOR USE:

Apply as directed. Apply 16 to 64 fluid ounces per acre. Applications may be repeated as needed depending on the crop, stage of growth, and severity of deficiency. The maximum recommended rates are for mature plants. Use lower rates when spraying smaller plants. If you have any questions regarding mixing or application rates contact your Macro-Sorb dealer before using this product.

Store in original container in a cool, dry area. Keep out of the reach of children.

Xenat-Ca is tank mix compatible with most soluble fertilizers, insecticides, herbicides, fungicides or plant growth regulators. If you are unsure of the compatibility of your specific tank mix, conducting a standard jar test prior to mixing is recommended.

CAUTION: Contains boron. Boron is recommended for all crops where boron may be deficient; however, excessive application to susceptible crops may cause damage.

Limited Warranty: Seller offers for sale the product Xenat-Ca. There are no warranties of merchantability of fitness for a particular purpose which extend beyond the description of the product in this label and liability of Seller is limited to replacement of any product which does not meet these specifications. Suggestions for use and information on results obtained with its use are assumed by the manufacturer to be reliable. Since conditions of use are outside the control of Seller, the buyer is responsible for all results, including injury and damage stemming from the use of this product alone or in combination with other materials.

Information concerning the raw materials composing this product can be obtained by writing to the Guarantor listed on this label and referring to the batch number found on this container. Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>
